## HEADQUARTERS-GLENDALE

#### JULY MEETING

#### Presentation of the Austin Competition Engine

The highlight of the meeting held July 9th was the presentation by Mr. Botwinick, Austin West Coast representative, of an Austin A40 Sports racing engine. The meeting was held on the first year anniversary of the visit of Alan Hesse to Los Angeles on his trip around the world in an A40 Sports. It was during this trip that Mr. Hesse became interested in FCCA's construction of a racing car and he was responsible for seeing that Austin of England heard about it.

The engine arrived very ceremoniously on Glenn Fancher's back and balanced by various other members of the Race Committee. After all present had had ample opportunity to ooh and aah, John Foster introduced Mr. Botwinick, who made a brief but pleasant speech wishing good luck to the Club in future competitive events...to which we say, good luck to Austin in all future models.

Trophies were awarded to the drivers and navigators on the Good Old Days Rally and to the winners of the Apple Valley Gymkhana. A special trophy was presented to Bruce Mooney, who entered his car in every race for which it qualified at Carroll Speedway, did a very good job of driving, and won the 1500 cc stock car race.

The meeting was wound up in fine style by the showing, in uncut form, of the movies taken at the Apple Valley Concours d'Elegance and Gymkhana, ably narrated by John Foster. If anyone thinks a gymkhana is confusing, he should see one run backwards via the reverse switch on the projector!

Sidelight...It was at this meeting that this issue of Exhaust Notes was born.

Coffee and doughnuts were served during the movie... just like a drive-in!

#### **AUGUST MEETING**

The August meeting of FCCA Glendale was held at Griffith Park Manor on August 20th. George Montrose presented medals to the top man in each class on the Scotchman's Drag Rally (results printed elsewhere in this issue). A special award for the holder of the seven of hearts, Mel Allen, was announced and will be given to him when the engraver finishes with it.

John Foster introduced Jim McHenry of Honolulu, who sells four-cylinder cars on the Islands. Mr. McHenry has extended an invitation to any member visiting over there to "eat poi" with him

An announcement of the coming classes for women, to be conducted by Glenn Fancher, was made by Ralph Davis and full details may be found on the Women's Page.

A meeting of the officers of the club was announced for the following Tuesday to discuss branches to be formed in Los Angeles County.

An Ivey Oiler was presented for the best serious and best humorous verse in the Ivey Oil Jingle Contest. The collection of verses was read by John Foster (you would have to hear to appreciate our John of England reading verse written in Brooklynese — goil, poil, etc.!)

Mr. Bud Ivey gave a brief but informative talk on additives and answered questions put to him by the members.

Briefing was given for the Hunter Hackney rally and for the Gaynor Peet Poker Rally.

Johnny Orlando and Barney West ran the movies they made at the Rocky Mountain Hill Climb to end the meeting in fine style.

#### LAKE TAHOE RALLY

By Hunter Hackney-H. Q.

The night before the rally John Orlando and I finished checking our Jupiter. The car was in perfect condition. Friday morning we arrived at the start at 6 A.M. sharp. No one wanted to start first so we lagged to see who would.

We started out with a 44 mph average, over the Angelus Crest Highway and the Vincent turn-off to Hwy. 6. Here was the first checkpoint, which was quite a surprise for all.

Now across the desert toward Mojave and onto Hwy. 395. At 9 A.M. we were 120 miles out from the start, near Little Lake. By 10 A.M. we were about 8 miles from Lone Pine, where we stopped for gas. Here we saw our first snow, high above us on the slopes. We headed for Bridgeport, 148 miles away, planning to loaf on in and stop for lunch. During this leg John worked on the maps, figuring when we should get to the next checkpoint. At 11 A.M. we were 115 miles from Bridgeport. At 12:05 we entered Inyo National Park. In 25 minutes we had climbed from 6,000 ft. to 8,041 ft., then dropped down the other side through a nice canyon.

At 1 P.M. we started up another very steep grade. This was as twisty as any Monte Carlo run; the down side was very gentle with long sweeping curves. At 1:20 we arrived at Bridgeport, 328 miles from the start.

We left Bridgeport at 2:57, averaging 30 mph so as to get to the checkpoint at 3:31 as planned. This is where we Continued on page 21

#### POBEZA continued

from a Jeep. The only thing that was not familiar is the carburetor, a large squarish-looking pot with a flat air cleaner on top. The engine compartment is neat. The starter is the now familiar Chevy component.

The column gear shift has standard American positions, three speeds forward and one reverse. Clutch is firm and the shift mechanism stiff, but this is an extremely new car. Starter is on the floor and though I didn't get to drive it, while I was sitting in the front seat, I felt right at home. Front suspension has independent coil springs and rear suspension has leaf springs slung under the frame. The rear sits rather high, but I was informed that the owner intends to lower it.

The body metal used in this car seems to be of a heavier gauge than in the American cars and, without undercoat, the hood sounds extremely solid, and the doors like those on a bank vault, etc. With the possible exception of the deck interior, which was quite cluttered, the workmanship seems to be of a very high standard.

We'll all have to wait until someone translates the manual before we can get the specifications. My only guess at what any of the countless characters printed upsidedown and backwards all over the car meant is that those frosted on the bottom of the windows mean safety glass.

Our thanks to Mr. Slotkin, Mr. Cohen, and Abbey Rents for letting us look it over.

#### TAHOE RALLY continued

now:

said goodbye to good roads; from here on in all roads are either under repair or they should be. We turned left on to Hwy. 108 at average of 34 mph, started up a narrow hairpin road that could compare with any Alpine trail. This was Sonora Pass, with a summit of 9.624 ft., and was the first real test of car and man; however, we rolled into Sonora on time, where there was a secret checkpoint.

We took an hour for dinner and then learned that there was a detour on Hwy. 49. After we passed through this detour we turned back to Hwy. 4 and Alterville.

From Alterville we headed for Tahoe at an average of 38 mph, at night.

At Arnold, 465 miles out from Los Angeles, we stopped for gas, etc. From here on in we drove like mad. These roads climbed up one side of a mountain and down the other with all hairpin turns. We really drove to maintain our average; however, we rolled into

the last checkpoint in good time, at 11:18 P.M. We all loved it.

On Saturday at 3 P.M. the Gymkhana started, with an appreciative audience from the hotel guests. This event added points to the totals, and was won by Bob Alley.

(Editor's Note: Hunter came in first in the Rally and tied for second in the Gymkhana . . . which made him the over-all winner . . . Congratulations!)

### **CLUB NOTES**

OAKLAND, CALIF. A riotous, eventful Reliability Run held by Oakland Region's F.C.C.A. contained all the excitement and spice of a main event, and caused elements of confusion on the part of both drivers and navigators. The club members became lost, missed check points (including the writer), ran into extreme winding, twisting turns that drove drivers and navigators half out of their wits, to smooth straightaways where time averaged itself out.

Three hidden check points were set up, with an average speed to be maintained between points and with an overall time for the completion of the run.

Those officiating were Ray Asmussen, Ringmaster; Elwood Soanes, Timer at finish; Ron Skillings, Checker; and Wesley Hansen, Checker.

The run extended from Oakland to Dublin, through Martinez, Crockett, Vallejo, Sears Point Road to Ignacio, San Rafael and Fairfax, where a family style picnic was held in Marin County's gigantic Redwoods.

Dennis Riley, driving an Austin 40 Somerset with less than 500 mi. on the speedometer, was the over-all winner, being only a matter of minutes off the allotted time of 2 hrs. 25 min. 53 sec. He was awarded a club badge. Guest Jack Lundquist in a 1951 MG-TD was second, and third place went to George Sisson, President of the organization, driver of an Austin 40 Sports Convertible.

Participating members and guests:

Mr. & Mrs. Ray Asmussen

Mr. & Mrs. Ken Wilson

Mr. & Mrs. George Sisson

Wesley Hansen

Charles Harvey & Son "Stu" Berry DAYTON, OHIO. During the month of June a Gymkhana was held at the Siler farm and we believe that this was our most successful meet to date. Our only trouble was that we had more guests than members, but we have been hard at work getting these guests into the fold and it looks as though it is paying off. The results of the Gymkhana were as follows:

1st (tie) Clem BaumanVolkswagor Bill AtwellMG-TC
Boyd KeysMG-TD
4th Hank WeberMG-TC
5th Harold RoggeMG-TD
6th Bud RothVolkswagor
7th F. E. ParkerVolkswagon Bus
8th James McNamaraCrosley
9th Jack FosterMG-TC
10th (tie)  Darrel MayMG-TE Shirley BoalFiat 500

The members enjoyed a game of broom polo, balloon lancing, blind driving, etc. Hit of the day was 5 year old Jeff Siler who toured the course in his King Midget. Already he is fast learning the Siler cornering method. Clem Bauman is now the proud owner of a new Morgan Plus Four. This, along with his two Volkswagons, must have convinced him that a four cylinder car is the thing. Jack Siler has finally traded off his highly polished MG-TD for a new model. Rumor has it that he spent several days just transferring his badges from one car to another. D. Grove Continued on page 24

GREATER NEW HAVEN, CONN. Our brush burns. After lunch, Don Smith first activity was a rip-snorting gaggle took his A-40 sedan on up to the drag to the Bridgehampton Road Races. Navigators Wilson and Fay were awarded TD in a match drag. We don't know the Grand Prize of a blown head gasket whether the MG was tired, or perhaps for leading us astray at least seven times. Don was inspired . . . anyway he did it. One of the highlights of the trip was the Had we been better organized, more Wagen/Volks (station wagon) leading of us would have gone through the the gaggle with banners and placards announcing the arrival of F.C.C.A. of New Haven into the hinterlands of Long Island. Such a good time was had by all, we are already planning a caravan to Watkins Glen in September.

#### **EDITORIAL** continued

necessary on one of our week-end jaunts. I trust that many Four-Cylinderites share my aversion to the complicated navigational problem posed by the estimable rally-masters.

One ray of hope brightens my personal horizon, and I trust that it may be a profound comfort to you other navigators on our next trek. I state in all humility that this is my own brainchild (Copyright June 22, 1952). Do not believe anyone else who claims this method as his own.

Now, to you of the F. C. C. A., is about to be unfolded the greatest aid to navigators since the sextant. My secret is a homely instrument, one easily available to all, and not the least bit complicated. A ONE MINUTE EGG GLASS.

The beauty of this is that you only need to turn it once in each mile to maintain a perfect thirty mile average. How many times have you pulled over to the side and consulted on how long you had to get where you were going? Merely hang this accurate timing device in a convenient spot and watch the sand

Have you ever stood and watched one of these simple miracles of engineering? And have you marvelled at the symmetry of the small mound on the bottom gradually growing before your very eyes? Few of us have been so privileged since Grandma got that automatic range.

No longer must the harrassed navigator consult charts en mass, use stop watches, or even simple trigonometry. All this and the esthetic joy of pure art forms.

Perhaps you may even become like my navigator, who on the Semena Nautica run, gazed lovingly at my slightly advanced (not recommended for beginners), three minute job, and sighed, "On that beach down there, there is enough sand to give peace to every navigator in the club."

Oh, by the way, does anybody need two dozen soft-boiled eggs?

Peter Satori BRITISH MOTOR CARS

PETER SATORI, BRITISH MOTOR CAR DEALER AND DISTRIBUTOR OF PASA-DENA, LOS ANGELES, AND BEVERLY HILLS, HAS AN HONEST ENTHUSIAM FOR THE FINE IMPORTED AUTOMOBILES HE SELLS, AND IS CONSTANTLY ON THE ALERT FOR IDEAS WHICH WILL ENABLE HIM TO GIVE HIS CUSTOMERS BETTER SERVICE AND MORE ENJOYMENT OF THEIR CARS.

#### HUNTER HACKNEY RALLY—GLENDALE

As we go to press we have the results, but little more, of the very successful rally staged by Hunter Hackney on Sunday, August 24. Forty-eight cars left the Rose Bowl in Pasadena at 8 A.M., ending after four check-points and many miles, up near Mt. Baldy in the San Gabriel Mountains. Altitude (around 6500 ft.) took out a goodly number of contestants with vapor-lock, overheating, etc.
